

HUButtonSM: A Web Button that Allows Click-to-Call

How It Works

We can put a button on your website or in your emails to prompt your target audience to get a call from you. Website visitors, upon clicking on the HUButtonSM and entering their phone numbers, receive a phone call that allows them to take action over the phone.

You can ask call recipients to:

- Complete a survey.
- Patch through to a legislator's office.
- Patch through to a call center.
- Sign up to help.
- Leave a recorded message.
- Or anything else you can do over the phone.

Benefits

- **Web-Phone Hybrid.** Use the web to engage supporters -- with the click of a mouse they can add their voices to your campaign or patch through to connect with your call agents.
- **Viral Propagation.** The button allows visitors to forward the link to friends.
- **Collect Data.** We collect the data entered by the call recipients and return it to you quickly.
